

Put all non-chord tones in parentheses  
 Identify the non-chord tones  
 Do a local harmonic analysis  
 Mark the cadences  
 Include voice-leading in all dominant complexes

On the reverse, do a timeline analysis of the phrase structure; for each phrase indicate one way in which it either anticipates a subsequent phrase (and is therefore "antecedent" or comments on, completes a previous phrase (and is therefore "consequent").  
 Include the number of measures + beats of each phrase  
 Call the first phrase circled "a"; the second, circled "b", etc.

Analyze the period structure of the passage

To what extent is the period parallel (the phrases begin similarly) or contrasting?

*Adagio.*  
*dolce*
